

# Clean

## BlueClean

BlueClean is a penetrating concrete cleaner and renovator that quickly dissolves lime deposits, scale, rust, mortar, algae and mud stains from concrete interior or exteriors. This product helps to prepare concrete to ensure reaction and penetration of EZCHEM stains. It also ensures better bonding of spray textures and overlay applications.

### ENVIRONMENTAL IMPACT

BlueClean contains no hydrofluoric acid, ozone depleting solvents or heavy toxic metals or chromates.

### BENEFITS:

- **BlueClean produces no harsh or irritating fumes**
- **Effective.** BlueClean can be used at full strength on difficult stains and will not degrade the concrete surface or interfere with staining of the concrete.
- **Fast Action.** BlueClean works fast and efficiently with deep penetrating action that lifts off the stains with minimum effort.
- **Economical.** Because it is a strong surface active penetrant, BlueClean does the job faster with less labour and minimal wastage.
- **Will not attack most metals.** Most of the metal encountered on the job will either be steel or aluminium. BlueClean is highly inhibited against attack on these metals. It will brighten copper and brass, but will not corrode them if washed off. It should not be used on magnesium, galvanized metal or stainless steel.

### HOW TO USE:

- Polyethylene or similar plastic sprayers and buckets are recommended for application. Do not use Nylon brushes. For safety, always use goggles and protective gloves.
  - Depending on the type of stain or soil, BlueClean may be used full strength or diluted up to 1:3 with water. Must be applied on damp surface.
1. Apply BlueClean by brush, spray, or dipping. For spray, use a very coarse spray pattern to avoid inhaling the mist.
  2. Allow it to soak for several minutes. Agitate heavy soils or stains with a stiff broom, then rinse thoroughly with water. Repeat application when necessary.

### DESCRIPTION

Pack size	: 5 litres / 25 litres
Type	: Penetrating detergent renovator
Colour	: Blue
Odour	: Pleasant
Toxicity	: Low- Do not take internally
VOCs	: Low
Flammability	: Non-flammable
Composition	: Biodegradable surfactants, inhibitors and acidic boosters.
