

Sealer

EZCHEM Sealer is an solvent based coating that forms a crystal clear coating that seals, beautifies, and protects all concrete surfaces. It is colourless and never yellows.

Applied over concrete stains, EZCHEM Sealer seals and enhances the colour, and locks in the colour to produce a permanent and beautiful stained floor. Once dry, a second coat may be applied to enhance the floor.

ENVIRONMENTAL IMPACT:

EZCHEM Sealer contains no chlorinated solvents or other ozone depleting solvents.

BENEFITS:

- **Clean and Colourless.** EZCHEM Sealer is water white and never yellows.
- **Seals and Beautifies.** EZCHEM Sealer penetrates into the pores of the concrete and seals out dirt and stains as it seals in the beauty.
- **Dries to a smooth, glossy, tough finish.** EZCHEM Sealer flows and levels to prevent brush strokes or roller marks and dries smooth and glossy.
- **Dries Quickly.** The active solvent system in EZCHEM Sealer evaporates completely. Once dry, your floor is ready to use.

HOW TO USE:

- Always ensure good ventilation when using EZCHEM Sealer
1. EZCHEM Sealer may be applied by brush or roller. Apply a thin uniform coat at each application.
 2. Allow coating to dry for 4 to 6 hours and apply a second coating for maximum durability.
 3. Equipments may be cleaned with EZCHEM Cleaning Solution.

DESCRIPTION

Pack size: 5 litres / 25 litres

Type: Solvent based coating

Colour: Colourless and clear

Odour: Solvent

Toxicity: Harmful if swallowed. Avoid breathing vapours.

VOCs: Depending on concentration

Flammability: Flammable

Composition: Polymers in an aromatic solvent base.
